Shaping Futures Through Smart Solutions.

The landscape of higher education has evolved. Campuses across the nation are embracing a more holistic approach to learning, engagement, and problem-solving. By incorporating innovative tools, creative methodologies, and inclusive environments, colleges everywhere are developing pathways that support personal well-being and unique intellectual pursuits.

With solutions designed to inspire and connect, HON is making a difference in secondary education spaces—today, tomorrow, and beyond.

From lectures to active learning, today's classrooms support a range of teaching and learning styles. Flexible environments help students stay engaged, while giving institutions the versatility to adapt to evolving academic needs.

Classrooms

Indeco x HON

SEMINAR ROOM
Etch. Motivate

Smaller class sizes encourage active learning, stronger interaction, and improved performance.

ACTIVE LEARNING
Field Trip, Etch

Socializing & Collaborating

With digital device usage at an all-time high, personal interactions are often overlooked and crucial opportunities for inclusion and belonging are missed. Socializing and collaborating are essential for positive mental health. Well-designed spaces foster connections where students and educators can meaningfully engage with one another and ensure everyone feels valued.

Fringe

The Fringe lounge collection offers seating and table solutions that can be combined to create large configurations or used separately to develop individual stations. From club chairs, benches, high and mid backs, and cove units, to occasional, inline, and bistro tables, Fringe has an extensive and diverse offering.

Narrate

Utilize Narrate's adaptable infrastructure to create diverse layouts and accommodate varying privacy levels. This modular system easily supports open spaces for collaboration and dedicated areas for focus. Narrate panels can be created with custom graphics, mixed materials, and hues that span from subtle to bold and timeless to contemporary.

Tag

With arm and armless models, as well as mobile and static options, Tag delivers solutions for any space. Add in counter and bar height stools, mid and standard sized bariatric models, and ganging capabilities, and this series has it all. Not only does Tag offer a variety of seating solutions, complete your space by incorporating coordinating ganging or freestanding tables.

Collette

Collette blends casual comfort with commercial durability. This lounge and tables collection pairs the relaxed aesthetic of residential furnishings with the durability and modularity of commercial furniture. Collette humanizes spaces, creating environments that spark connections.

Learning

Flexible solutions that can easily be arranged and rearranged to meet everchanging needs, including flipped classroom arrangements, are essential. This freedom gives instructors the opportunity to create stations for interaction and collaboration, as well as heads down focus areas. This versatility allows for a richer learning experience.

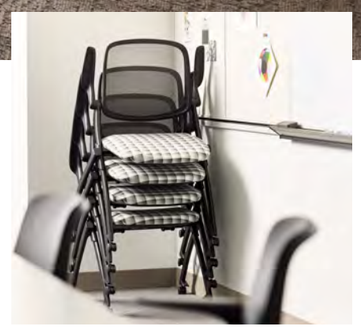
Zing

Zing is a flexible table collection designed for learning environments that shift throughout the day. With intuitive flip/nest capability, integrated power, and a range of shapes and heights, it easily transitions from lecture to collaboration while keeping technology accessible and clutter free. Thoughtful details like generous kneespace and durable construction support comfortable, active learning.



Chaddy

Chaddy offers extreme versatility and exceptional comfort. This multipurpose seating solution easily transitions from occupied to nested (for efficient storage) to stacked (for maximum space management). Its sleek profile, beveled seat contours, and optional tablet arm create the perfect combination of style, comfort, and performance.

Trends Shaping the Landscape of Higher Education

The landscape of education is rapidly evolving. To attract new learners and educators, it's imperative for architects, designers, and institutions to adapt. Kimball International explores key trends that are shaping the future of education. They are focused on finding new ways to create supportive environments and innovative design solutions.

The Definition Of "Learner" Is Evolving.

Scholars encompass a broader spectrum, including lifelong learners or "forever students" driven by technological advancements, career shifts, and the necessity for continuous skill development. Businesses and universities must partner together to create programs and shared spaces to enable academic success.

Institutions Are Catering To A Global Audience.

Education facilities are embracing technology and innovative teaching methods to transcend geographical barriers, ensuring inclusivity without compromising on standards. Learning spaces must incorporate tech-savvy solutions to support a variety of learners.

Eklund

One-Size-Fits-All Learning Models Are Fading.

Students are demanding more personalized learning experiences that cater to their individual needs, learning styles, and aspirations. Educational spaces must be flexible and adapt to accommodate this shift. Staff also must flex to new styles of teaching.

Mental Health Support Cannot Be Overstated for Attraction and Retention

It's no longer enough to simply offer strong academic programs. Both students and educators face mounting pressures, making it essential for institutions to prioritize holistic well-being. Integrating amenities such as private courtyards, relaxation lounges, sensory rooms, and counseling services within educational spaces can play a pivotal role in supporting mental health and neurodiversity, fostering a supportive campus community.

Partners in Shaping the Campus Experience

Imagine. Explore. Achieve.
Step into a future where every campus space is intentionally designed to inspire discovery. Our holistic design approach blends accessibility, flexibility, comfort, and sustainability—aligning with the principles of human-centered design to foster belonging, engagement, and innovation.

Spaces & Applications

Every campus space tells a story of connection, creativity, and possibility. Through human-centered design, KI aligns culture, brand, and function to create environments that inspire. The following applications showcase how adaptable furniture empowers user choice, encourages collaboration, and supports the evolving needs of today's learners and educators.

Classrooms

From lecture halls to tiered and applied learning environments, classrooms are the academic core of campus life. These spaces are designed to foster engagement, adaptability, and collaboration, empowering every learner and teaching style.

Libraries & Learning Commons

Libraries and learning commons blend quiet study, collaboration zones, and technology-rich resources, these spaces encourage exploration, connection, and discovery.

Student Life

From esports arenas and lounges to cafés, athletic facilities, and wellness spaces, student life environments define the rhythm of campus culture. Designed for connection, recreation, and well-being, they nurture a sense of belonging and community beyond the classroom.

Residence Life

Residence life are spaces where campus life becomes personal. These spaces support rest, study, and community. Designed with comfort, flexibility, and inclusion in mind, they foster connection and independence as students grow into their next chapter.

Auditoriums & Performing Arts

Auditoriums and performing arts centers celebrate expression and shared experience. Thoughtful design enhances visibility, acoustics, and comfort, transforming these venues into immersive spaces for learning, performance, and inspiration.

Administrative & Faculty Spaces

Administrative areas are the operational and organizational hubs of campus, connecting students, faculty, and staff. From private offices to mobile work points, these spaces balance professionalism, accessibility, and flexibility to support the institution's daily rhythm.

Classrooms

Higher education classrooms are evolving into dynamic, multi-modal environments that bridge teaching, research, and collaboration. Designed with accessibility, comfort, and adaptability in mind, today's classrooms balance technology integration with human connection.

From lecture halls and tiered classrooms to applied learning labs, these spaces support the full spectrum of learning, whether it's focused listening, interactive dialogue, or hands-on exploration. Flexible layouts, mobile furniture, and purposeful zoning empower instructors to easily shift between presentation, group work, and active learning—creating spaces where ideas move as freely as people do.

Design tips:

- Incorporate flexible layouts that transition seamlessly from lecture to collaboration.
- Use tiered seating and clear sightlines to enhance engagement in large classrooms.
- Integrate power, technology, and mobile furnishings for hybrid and applied learning.
- Layer acoustics, lighting, and materiality to support comfort and focus.
- Balance openness and structure to accommodate diverse teaching methods and learning styles.

Libraries & Learning Commons

Libraries and learning commons have evolved beyond quiet study zones. Today, they're active, interdisciplinary environments that bring together research, collaboration, and community. These spaces balance digital access with human connection, offering areas for focused study, peer discussion, and informal gathering. Through thoughtful spatial planning and adaptable furnishings, libraries and commons support a range of learning modes, from immersive concentration to creative exploration, while reflecting the institution's culture and brand identity.

Design tips:

- Create distinct zones for individual focus, small-group collaboration, and social interaction.
- Integrate mobile furnishings to accommodate spontaneous and project-based work.
- Use warm materials, biophilic elements, and acoustic balance to enhance comfort and concentration.
- Prioritize visibility and intuitive circulation to encourage exploration and accessibility.
- Blend analog and digital resources to support evolving research and learning styles.

Student Life

Student life spaces shape the rhythm of campus; where community, connection, and identity come to life. From esports arenas and lounges to cafés, athletic facilities, and wellness centers, these environments support balance, belonging, and personal growth beyond the classroom.

Designing for student life means creating flexible, inviting destinations that encourage interaction and inclusivity. Through intentional use of color, comfort, and adaptability, these spaces nurture engagement, renewal, and pride in place.

Design tips:

- Blend social and restorative zones to promote both energy and relaxation.
- Incorporate durable, flexible furnishings that adapt to a variety of activities and user groups.
- Use lighting, texture, and materiality to define atmosphere and mood.
- Design for inclusivity ensuring accessibility and comfort for all users.
- Integrate technology and power access to support esports, study, and collaboration in shared spaces.

Residence Life

Residence life are spaces where campus life becomes personal. These spaces shape daily routines, relationships, and personal growth. From shared lounges and study areas to private rooms and suites, these environments balance comfort, privacy, and connection to create a true sense of home on campus.

Designing for residential life means supporting both community and individuality through flexible layouts, durable materials, and thoughtful amenities that encourage well-being and belonging.

Design tips:

- Balance social and private zones to foster both connection and retreat.
- Incorporate flexible, modular furnishings to adapt to diverse room layouts and student preferences.
- Use warm materials, lighting, and color palettes to enhance comfort and emotional well-being.
- Integrate shared amenities and collaboration zones to build community.
- Prioritize durability and cleanability without sacrificing residential character.

Auditoriums & Performing Arts

Auditoriums and performing arts centers are the cultural and creative heartbeats of campus life. These venues host lectures, performances, and events that inspire expression, connection, and shared experience.

Designing these spaces requires balancing acoustics, sightlines, and comfort with a sense of presence and prestige. Thoughtful material choices and adaptable layouts ensure each performance or presentation feels immersive, inclusive, and unforgettable.

Design tips:

- Prioritize acoustical performance through materials, form, and spatial planning.
- Ensure unobstructed sightlines and intuitive circulation for both performers and audiences.
- Integrate flexible seating and stage configurations to accommodate varied event types.
- Use lighting and finishes to enhance atmosphere, focus, and drama.
- Provide comfortable, ergonomic seating to support extended engagement.

Administrative & Faculty Spaces

Administrative areas, faculty offices, and meeting spaces form the operational and intellectual backbone of higher education, where leadership, planning, and collaboration intersect with the pursuit of knowledge. These environments bring together faculty, staff, and students to exchange ideas, foster mentorship, and sustain academic engagement. From private offices and reception areas to shared work zones and mobile touchdown points, these spaces balance professionalism with accessibility and connection.

Designed for focus, flexibility, and collaboration, administrative and faculty environments should promote clear communication, reflect institutional identity, and provide a welcoming atmosphere for all who teach, learn, and lead.

Design tips:

- Incorporate ergonomic seating and adjustable work surfaces for comfort and productivity.
- Use transparent or semi-open layouts to enhance approachability and connection.
- Plan for mobile and hybrid work with flexible touchdown spaces and mobile lecterns.
- Integrate acoustic and visual privacy elements to balance collaboration with concentration.
- Select materials and finishes that reflect institutional identity and create a professional, welcoming atmosphere.

PALLAS

At Pallas Textiles, we believe design in higher education should reflect curiosity, connection, and the pursuit of possibility. Our fabrics bring a refined sensibility to campus environments, uniting beauty, comfort, and performance. From vibrant student lounges and collaborative commons to focused study zones and faculty spaces, Pallas textiles withstand the demands of campus life while supporting well-being and creativity. Thoughtfully crafted, easily cleanable, and built to perform, each textile helps shape environments where ideas flourish and communities thrive.

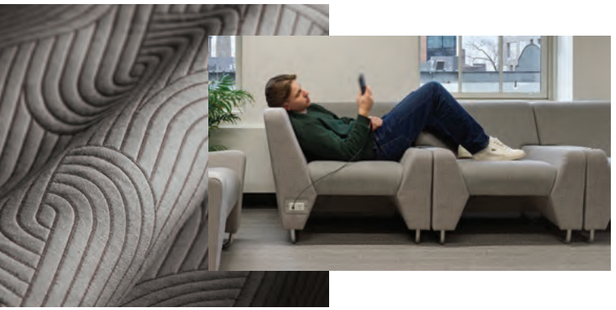
PALLASTEXTILES . COM

KI WALL

Our passion lies at the intersection of elegance and functionality. With expert craftsmanship and laser precision, we work with you to bring your designs to life—transcending traditional interior architecture, fostering spaces where people learn, grow, and thrive.

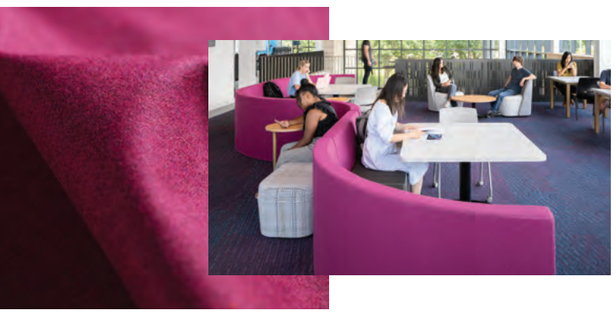
IT ' S WALL S, REIMAGINE D.

KIWALL . COM



VISUAL STORYTELLING

From student unions to study lounges, every surface tells a story. In higher education, textiles do more than meet a specification, they shape the identity, energy, and experience of a space. Through color, texture, and pattern, Pallas helps define environments that inspire connection, creativity, and a lasting sense of place.



EXPRESSION OF CU LTURE & CHARACTER

Flexible by design—Pallas empowers colleges and universities to express their unique identity through curated palettes and adaptable patterns.

DURABILITY WITHOUT COMPROMISE

Pallas balances elevated aesthetics with lasting performance. Crafted for high-traffic environments, our textiles maintain their elegance while delivering the durability and cleanability institutions need.

WEL L- BEING & SENSO RY ZONES

In higher education, flexible space division is essential to balance connection and concentration. KI Wall architectural wall solutions, including WiggleRoom® pods, create private, calming environments that enhance well-being and support today's diverse learners.

From libraries and student unions to counseling centers and residence halls, these spaces offer quiet refuge for study, reflection, or one-on-one conversations. Certified as Autism Resources by IBCCES, WiggleRoom pods are intentionally designed to reduce sensory overload, promote focus, and foster inclusion—helping every student feel supported, centered, and ready to thrive.

WALLS TH AT INSPIRE

KI Wall architectural wall solutions bring flexibility and beauty to educational spaces with walls that integrate technology and include writable surfaces for collaboration. Slim profiles and seamless glass panels create open, light-filled environments, while a wide range of finishes, doors, and hardware options let you tailor both the look and function of every space.

SMARTER BY DESIGN

Partnering with KI Wall means faster, simpler, and more cost-effective installations—with panels that arrive fully assembled and can be reconfigured without disruption. Flexible financing and tax advantages help maximize your investment while our craftsmanship, 10-year warranty, and full-service team ensure lasting value.

KI Wall delivers adaptable spaces built to perform beautifully for years to come.

Indeco x OFS

Bringing the Future of Learning to Life.

Learning is no longer linear—it's about making connections, not just memorizing facts. Whether students are interacting with people, information, or experiences, flexibility enables students to curate their space to support how they learn best.

More and more students are drawn to places designed around them—spaces that allow them to interact, focus, and learn alongside each other. Informal social spaces between office and instruction areas become hotspots of activity and curiosity. Environments that encourage learning outside of class allow students to collaborate, build relationships, and feel part of a community.

The right place for focus and preparation can help instructors do so much more. Similarly, when faculty pair personal offices with collaborative hubs, casual interactions and meaningful relationships can help instructors connect with students and create a better environment for learning.

Let’s Imagine Education Spaces for People

After decades of experience and conversations around the future of education spaces, we have designed solutions that enable the right amount of adaptability to support students and faculty alike. We hope this lookbook will offer inspiration for your next education project, showcasing case studies from across the United States to help you imagine education spaces for people.

Café + Common Areas

Places to connect to other students, faculty, friends, and communities support a holistic learning experience for students. Common areas are the heart of learning spaces, creating environments where students and faculty can authentically create community. We believe we are better together, so here is some inspiration to help you create places that empower people to connect.

Learning + Classrooms

Education is where a student's most formative learning happens, and spaces that enhance a diversity of learning modes can play a key role in a student's success. The right places have the power to ignite discovery. We believe discovery is a fundamental human need, because the places that inspire us to discover help us imagine new ideas, information, and ways of thinking – changing the way we approach our lives and putting us on a path to become a lifelong learner.

Libraries + Study Spaces

Whether planning a lesson or writing an essay, places to focus provide both instructors and students with a chance to balance collaboration with individual work. Libraries and study spaces create environments for either individual focus or collaboration, enabling us to get things done. This means drawing together people, ideas, and information to better understand for the future. When we bring things together we can work “in the zone” and solve problems we otherwise couldn’t.

Better Learning Environments

Active Environments.

Today, learning means so much more than sitting and listening. It's engaging in conversations and debates, trying things hands-on, and working together to take ideas further. Students are getting up and out of traditional learning spaces, bringing study and idea sharing into everyday places. We're right there to meet them, with smart, flexible furniture designed to help them socialize, learn, collaborate, and focus.
